Citizen's Atlas of the World

GENERAL INDEX

For the speedy finding of a place, the rectangles formed on the maps by the intersection of the lines of latitude and longitude are indicated by capital letters along the top and bottom margins of the maps and by small letters down the sides. The number immediately following the names and preceding the marginal letters is that of the page of the atlas in which the place will be found. For example, the name **Aachen** will be found on page 74 of the atlas, under the top marginal letter **B** and along from the side small letter **c**.
